

Fatima Butt

+92(315)089-4502 | fatimabutt2k23@gmail.com

Summary

Software Quality Assurance Intern with hands-on experience in manual testing, functional testing, regression testing, mobile application testing, responsive testing, performance testing using Apache JMeter, healthcare software documentation, and AI knowledge-base training. Experienced in testing enterprise healthcare applications while collaborating with developers, designers, and QA engineers to identify, reproduce, and verify software defects. Additionally skilled in MERN Stack, React, Angular, REST APIs, and modern web development. Passionate about building reliable software through quality engineering and continuous learning.

Key Tools & Technologies

Quality Assurance

Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Mobile Application Testing, Responsive Testing, Performance Testing, Bug Reporting, Test Documentation, User Acceptance Testing (UAT)

QA Tools

Apache JMeter, Postman, Chrome DevTools

AI

AI Knowledge Base Training, Chatbot Testing, Prompt Validation, AI Response Evaluation

Frontend

HTML, CSS, JavaScript, React, Angular, Bootstrap, Tailwind

Backend

Node, Express, REST API

Database

MongoDB, MySQL, PostgreSQL, Firebase

Languages

C++, Python, JavaScript

Tools

Git, GitHub, VS Code, Figma, Canva

Experience

Frontend Intern | Elevvo Pathway

Remote | Sep 2025 – Sep 2025

- Completed a one-month internship focused on frontend and backend development.
- Worked with React for frontend interfaces.
- Gained hands-on experience with the React and collaborative team projects.

Care Solutions (SMC-PVT) Ltd

(31-June-2025 _ 31-August-2025) Intern

- Worked on Qatar's medical application development and contributed to front-end features using Angular.
- Gained hands-on experience with API integration and testing of application modules.
- Collaborated with the team to identify bugs and assist in debugging.
- Participated in remote and on-site tasks related to project development.

MERN + DSA Trainee (Bronze Certified) | Dev Weekends

Remote | Apr 2025 – Sep 2025

- Completed a 6-month intensive program focused on MERN Stack development and Data Structures & Algorithms (DSA).
- Earned Bronze Certification for strong performance among 800+ participants from nearly 5 countries.
- Developed and optimized full-stack projects, applying advanced problem-solving and programming concepts.
- Collaborated in team-based projects, code reviews, and mentorship sessions led by industry professionals.

eCare Solutions (SMC-PVT) Ltd

(1-June-2026 _ 31-August-2026) Intern

- Performed manual, functional, regression, and responsive testing for multiple healthcare management system modules, ensuring application quality and usability.
 - Tested web and mobile healthcare applications across modules including ClinCare, ERCare, IPD, OT, Procurement, Inventory, Laboratory, Radiology, Pharmacy, Reception, Doctor, and Nurse workflows.
 - Executed performance testing using Apache JMeter to evaluate application behavior under different load conditions and identify performance bottlenecks.
 - Identified, reproduced, documented, and verified software defects while collaborating closely with QA engineers, developers, and designers to improve system reliability.
 - Prepared and maintained user documentation, workflow documentation, and module screenshots following standardized naming conventions and documentation practices.
 - Contributed to the development and validation of the Ask mCare AI Assistant by training the healthcare knowledge base with module-specific scenarios and verifying chatbot responses for accuracy and consistency.
 - Conducted extensive chatbot validation by testing hundreds of healthcare-related queries, identifying response inconsistencies, role-mapping issues, and knowledge retrieval gaps, and reporting findings to the development team.
 - Worked with REST APIs during application testing and assisted in validating integrated system functionality across multiple healthcare modules.
 - Participated in daily task reporting, issue tracking, and cross-functional collaboration within an Agile software development environment.
-

Skills Demonstrated

Manual Testing • Functional Testing • Regression Testing • Mobile Application Testing • Responsive Testing • Performance Testing (Apache JMeter) • Bug Reporting • Test Documentation • Healthcare Information Systems • AI Chatbot Testing • Knowledge Base Training • REST API Testing • Agile Development

Projects

Appointment app | Full Stack (MERN)

- Developed a full-stack appointment booking application using MongoDB, Express.js, React, and Node.js.
- Enabled users to schedule, update, and cancel appointments with real-time availability tracking.
- Implemented JWT authentication and role-based access control for secure login and admin management.
- Integrated RESTful APIs for smooth data flow between frontend and backend.

Wix Portfolio Website | Personal Project

- Designed and developed a responsive portfolio website using Wix, showcasing web design aesthetics and smooth navigation.
- Integrated animations, dynamic pages, and SEO optimization for better performance.
- Demonstrated ability to build complete client-ready websites using Wix tools and custom code.

React E-Commerce App | MERN Stack Project

- Built a functional e-commerce web application using React, Node.js, Express, and MongoDB.
- Implemented user authentication, product management, and cart functionality.
- Focused on scalability, responsive UI, and clean REST API integration.
